# “NEW” INNOVATIVE TIE BARS

Race Proven  
Swivel End  
Low Profile Design

Tie Bars and Mounts for  
Mercury Marine #6 Drives  
and Mercury Marine #8 Drives

## Outboard and Bravo Tie Bars

Since the first use of tie-bars, a common misconception is that the tie bars should be mounted between the drives using the ear-type ene-cap mount. This configuration will only last so long because it causes the tie-bar to twist and will likely cause it to break! Not so with the patented Zeiger tie bars. Ours are designed to swivel, not twist.

Bravo 360°  
Tubular Swivel Tie Bars

360° Swivel End

Adjustable  
End with Lock Nut
